Profile

Full Stack Developer with experience in building end-to-end web applications using modern frontend and backend technologies. Skilled in system analysis, translating business requirements into scalable solutions, and delivering high-quality applications. Strong analytical and problem-solving skills, adaptable to new technologies, and effective in both independent and collaborative environments.

Technical Skills

- **Language:** PHP, JavaScript, TypeScript, Java, Go, Dart
- **Framework:** Laravel, Vue.js, React.js, Express.js, Inertia.js, Flutter, Bootstrap, Tailwind.
- **Database:** MySQL, PostgreSql(Supabase)
- **Tools:** Git, Github, Postman, Docker, Figma, Draw io

Experience

Majelis Pemberdayaan Masyarakat Pusat Muhammadiyah | Internship February 2026 - July 2026

- Developed RESTful APIs using Laravel to support a web-based Information System.
- Analyzed business requirements and designed system architecture, including ERD, flowcharts, and database schemas.
- Designed and optimized MySQL databases to ensure data integrity, performance, and scalability.
- Collaborated with the frontend team to integrate backend APIs with React.js, ensuring seamless system functionality.

PT. RM Transino | Freelance January 2026 - Juny 2026

- Developed RESTful APIs using Laravel for a Fleet Component Health Monitoring System.
- Analyzed business requirements and designed system architecture, including ERD and database schemas.
- Designed and optimized MySQL databases for efficient and scalable data management.
- Collaborated with the frontend team to integrate backend APIs with Vue.js.

Education

- **Universitas Sebelas Maret | Associate Degree in Informatics Engineering** 2024 - Present
- **SMKN 2 Karanganyar | Software Engineering** 2021 – 2024
