Profile

Full Stack Developer with experience in building end-to-end web applications using modern frontend and backend technologies. Skilled in system analysis, translating business requirements into scalable solutions, and delivering high-quality applications. Strong analytical and problem-solving skills, adaptable to new technologies, and effective in both independent and collaborative environments.

Skills

- **Languages:** PHP, JavaScript, TypeScript, Java, Go, Dart
- **Frameworks:** Laravel, Vue.js, React.js, Express.js, Inertia.js, Flutter, Bootstrap, Tailwind.
- **Databases:** MySQL, PostgreSQL
- **Tools:** Git, Github, Postman, Docker, Figma, Draw io
- **Soft Skills:** Team collaboration, problem-solving, communication, adaptability

Experience

Majelis Pemberdayaan Masyarakat Pusat Muhammadiyah | Internship

February 2026 - July 2026

Backend Developer

- Developed RESTful APIs using Laravel to support a web-based Information System.
- Analyzed business requirements and designed system architecture, including ERD, flowcharts, and database schemas.
- Designed and optimized MySQL databases to ensure data integrity, performance, and scalability.
- Collaborated with the frontend team to integrate backend APIs with React.js, ensuring seamless system functionality.

PT. RM Transino | Freelance

January 2026 - Juny 2026

Backend Developer

- Developed RESTful APIs using Laravel for a Fleet Component Health Monitoring System.
- Analyzed business requirements and designed system architecture, including ERD and database schemas.
- Designed and optimized MySQL databases for efficient and scalable data management.
- Collaborated with the frontend team to integrate backend APIs with Vue.js.

Education

- **Universitas Sebelas Maret | Associate Degree in Informatics Engineering** 2024 - Present
- **SMKN 2 Karanganyar | Software Engineering** 2021 – 2024

Featured Projects

Mentora – Sistem Informasi Manajemen Dampingan MPM Muhammadiyah | Internship Project

Tech Stack: Laravel, React.js, MySQL, REST API

- Developed a scalable backend using Laravel and MySQL.
- Designed database schemas and system architecture based on business requirements.
- Built RESTful APIs to enable seamless communication between frontend and backend.
- Collaborated with frontend developers to integrate APIs with a React.js application.

Sistem Informasi Monitoring Armada PT RM Transindo | Freelance Project

Tech Stack: Laravel, Vue.js, MySQL, REST API

- Developed a scalable backend using Laravel and MySQL.
- Designed database schemas and system architecture based on business requirements.
- Developed and maintained REST APIs for data exchange between frontend and backend.
- Collaborated with frontend developers to integrate REST APIs into a Vue.js application.

Tama Coffee – QR Code Coffee Shop Ordering System | Academic Project

Tech Stack: Laravel, Vue.js, MySQL, Midtrans Payment Gateway, REST API, Docker

- Developed a QR code-based coffee shop ordering system with Laravel and MySQL.
- Built REST APIs for ordering, payment, and role-based dashboard functionality.
- Integrated Midtrans Payment Gateway for secure online payment processing.
- Collaborated with frontend development to integrate APIs with a Vue.js application.
